READ ME

- 01. Install XAMMP.
- 02. Insert in to one folder given .php files and html files.
- 03. Copy that folder XAMMP→hdocs paste here.

04. Now start xammp.

05. Go to phpMyAdmin and add two tables .Database name same as db.php connection database name.

```
E:\XAMMP\htdocs\Phptuteserver\db.php - Notepad++
